

Suggested Attendees

Different staff will be required at different stages of the project that would be defined during the project requirement stage

Service Content

- Project set-up**
 We will ensure that the project is managed to the highest standard and satisfies the user requirements while respecting the constraints produced as efficiently as possible. To achieve this we will organise, plan, monitor, control the project through to a successful delivery.
- Requirements Analysis & System Specification**
 Agresso can assist the Institution in developing their requirements thus ensuring the business requirements are satisfied using the most appropriate technology. On completion of an agreed requirements document our consultant will produce a system specification that will be approved by both parties ensuring your system exactly matches your requirements. Wherever possible, the requirement and system specifications will be merged to form one complete document.
- Application shaping**
 Once the system specifications have been approved, our consultants will shape the application using the technologies agreed during the requirements and system specification stage. Generally, the most popular development method is the WEB which is easily distributable. The application will be written to pre-defined standards and tested by the consultant ensuring limited scope for mis-interpretation.
- Implementation**
 Our consultants will implement the application on site and if required assist your technical department with any aspects of the technical infrastructure required to run the application. We are happy to assist with WEB implementation, Security etc.
- Training/Consultancy**
 Once implemented, our consultant will provide you with the necessary training and consultancy to implement the application on site. This may include the overviews stated in the pre-requisites section above.
- Support**
 Once accepted, on-going support would normally be provided by your organisation. Where required, Agresso can provide support to aid a continued successful implementation. To ensure you get the maximum benefit from your applications we can also provide consultancy, both telephone and on-site.

Course Objectives

Our objective for turnkey personalised WEB development is to allow an Institution to take full advantage of the resource availability, technical and product expertise and business experience of the Agresso staff by shaping the Agresso QL products around the business critical processes of an organisation. Where required, we can analyse your business requirements, design, requirements, design produce, & implement WEB based application shaping. This service also includes staff training along with technical telephone & site based support.
