

Course Aim

The aim of this course is to introduce the new functionality of the student/financial integration, as well as covering the current functionality contained within the software.

Pre-requisites

The attendee should be involved in the enrolment , fee taking, posting and analysis procedures.

Suggested Attendees

The course is designed for Student and Financial Administrators that are closely involved in student enrolment and monitoring

Course Content

- **Fee Module Parameters**
Users are introduced to the new posting level and sponsor flooding parameters.
- **Fee Status**
Introduction to the new status field within the student area of study fee details screen.
- **Post Fee Batches**
Introduction to the new features within this screen such as the "Find Batch" button.
- **ISR Fee Waiver Mapping**
Showing the enhancement that allows Agresso QL Students fee waiver codes to be mapped to FEFC waiver codes and the ISR qualification aim data set updated with the FEFC code when fees are created.
- **Invoice Printing**
Introduction to the new fields that are available to be included on an invoice.
- **Agresso QL Students/Agresso QL Financials Integration Parameter Screen**
Explanation of a new menu option in the fee definitions menu options. This is used in the integration of the student fee from Agresso QL Students to Agresso QL Financials.
- **Agresso QL Students Document Tracking Parameter Screen**
A new feature which will enable the user to track student fee transactions to Agresso QL Financials and back again.
- **Student Fee Enquiry**
A new menu option which will enable users to make enquiries into student fees. This also incorporates a "more details" button and the document tracking option.
- **Student Fee Account Integrity Check**
This new feature links together the integration parameter screen, document tracking and student fee enquiry to produce and integrity check on the student account details.

Course Objectives

The attendee will obtain a greater understanding of the new functionality contained within the software.
