

### Course Aim

To provide Consultancy on the linking of Agresso QL Students to Laminex

### Pre-requisites

The attendee should previously have attended the Agresso QL Students Desktop Navigation Training Course. The ID PRO Software should be installed and Training undertaken. Also a Database should be set-up in ID PRO.

### Suggested Attendees

This course is intended for delegates who are implementing Laminex integration. Moreover those who will be using the ID PRO software could attend the course.

### Course Content

- Configuration of Integration**  
 Configuration includes the setting up of all required parameter fields, which enable Agresso QL Students to integrate to ID PRO.
- Mapping Fields**  
 The mapping of fields available between Agresso QL Students and ID Pro using the Mapping Building. The Agresso QL Students fields selected are then matched to the ID RO using the Mapping Builder. The Agresso QL Students fields selected are then matched to the ID Pro fields for use on the actual Badge Design.
- Student Capture**  
 The selecting of the required student from the Agresso QL Students Database, and the capturing of the students image.
- Badge Printing**  
 The setting of parameters to enable the ID Card to be produced.

#### Course Objectives

The attendee will gain a fuller understanding of the integration between Agresso QL Students and Laminex, with the ability to map fields between two entities. The attendee will also demonstrate the ability to select a student for image capture

#### Methodology

Some hands on training provided by the course leader in the use of Lamiex integration software, together with practical Consultancy in the process of producing Student Identification Cards.

#### Duration

1 day  
From 10.00 a.m. - 16.30 p.m.

#### Location

Agresso's Swansea Training  
Centre or customer site

#### Cost

POA - dependant on location.
