

## Course Aim

The aim of the Agresso QL Students V4 Securities Management training is to provide the attendants with knowledge of how to use the Agresso QL Students V4 Securities Management to setup different access rights to V4 forms for different Agresso QL Students workgroups and users. Different workgroups and users can also be organised into *Roles*; a new concept that is introduced in the Agresso QL Students V4 Securities Management module and is further explained in the training.

## Pre-requisites

It is advisable that the attendants are confident users of database applications.

## Suggested Attendees

The Agresso QL Students V4 Securities Management training is intended for top-end users (e.g. system administrators) that are responsible for the setup and maintenance of the Agresso QL Students V4 environment at the institution.

## Course Content

The topics covered in the training day are as follows:

- **Parameters**
- **Resources**
  - Roles
  - Workgroups
  - Users
